

Frequency Range	2-30 MHz (with antenna cables)
Power	1000 W ERP average
Antenna	Compatible with RF-2601 and RF-382 Antenna Cables
Beamwidth	4-8° (with optional narrowing)
Bandwidth	Essential 2-12 MHz (single tone)
Applications	13-30 MHz military Aircraft 2-12 MHz omnidirectional

The L3Harris RF-1950 is a high-power, narrowband, omnidirectional antenna for Near Earth Airborne (NEA) and medium range coverage. Engineered for performance, the antenna's elements are secure and galvanically isolated to a 30-foot, rugged mast. For galvanic isolation, the antenna is designed with an internal high-voltage shield. The RF-1950 is a high-angle frequency ELEC RECAT main function for
